Being in an Online World - Towards a New Digital Psychology
Towards a New Digital Psychology

Do new technologies change the way we think, feel and act? The rules governing the behaviours and minds of humans are routinely studied by psychologists but with little reference to everyday life after the digital revolution. While the media depict our interactions with an online world as both enticing and dangerous, this course takes a look at contemporary research and theory with an aim of outlining principles of a "new psychology". A particular focus will be on the social and cognitive factors that are relevant for how we interact with technology and how we interact with each other through technology.

The course is designed for an interdisciplinary group of participants. Next to psychology, neighbouring disciplines such as Communication Studies and Computer Science provide a suitable background. Course outcomes will be developed, documented and summarised in a collaborative way. Formal teaching will alternate with group and team exercises, involving design tasks, project planning and out-of-classroom activities. A strong focus will be on communicating, discussing and applying primary research studies.

On our website you can find a more detailed description.

Topics may include

• Networking online
• Embodied cognition and mobile technology
• Memory and Remembering
• Big Data & Psychological Knowledge

After this course you are able to

• Demonstrate an understanding of theory and research on the psychology of human-technology interaction
• Apply psychological knowledge of digital phenomena, and that of neighbouring disciplines, to real-world events and problems
Number of EC
2 ECTS credits

Course leader
Dr Jens Binder, Senior Lecturer in Psychology
Department of Psychology, Nottingham Trent University

Entry level
Advanced Bachelor and Master

For whom is this course designed
Everyone who has an interest in mechanisms contributing to addiction, its development and persistence and who is in contact with people suffering from addiction in any form of daily practice.

Dates
Monday 7 August – Friday 11 August 2017

Course fee
€ 525

Discounts
• 10% discount if you register before April 1, 2017.
• 15% additional partner-discount for students from partners universities on all course fees!

More than just a course!
Radboud Summer School is more than an academic event. It is a unique opportunity to meet other international students and researchers and to get to know Radboud University and the city of Nijmegen. Our participants come from all over the world and have different cultural and academic backgrounds. Our programme includes the following activities free of charge: welcome reception, sports activity, guest lecture and farewell drink. We offer also a BBQ, River Cruise, City Tour, Pub quiz and excursion for a small fee.

Have a look at what participants had to say about their experience!

And do not forget to register now!

Deadline application
June 1, 2017
