PART I GENERAL PROVISIONS

Section 1. General provisions

Article 1.1 Applicability of these regulations

1. These Education and Examination Regulations (EER) apply to the Bachelor's programmes (the degree programme in which the student is enrolled is hereinafter referred to as 'the programme'), including all their components, of the Faculty of Science. These EER outline the applicable procedures, rights, and obligations concerning teaching, interim examinations and final examinations.
2. The present regulations apply to all students enrolled in the programme in the 2021–2022 academic year. Students who started the degree programme before 1 September 2016 and have been continuously enrolled in this programme may appeal to the EER that was active at the time of their initial enrolment in the programme.
3. Course components provided by different faculties or institutions are subject to the rules applicable at the faculty or institution in question. Components offered by the Faculty of Science are subject to the regulations described in at least one of the EERs of the Faculty of Science at all times.
4. The faculty offers the following Bachelor's programmes:
 - a. Biology;
 - b. Chemistry;
 - c. Computing Science;
 - d. Molecular Life Sciences;
 - e. Physics and Astronomy;
 - f. Science;
 - g. Mathematics.
5. The degree programmes have a study load of 180 EC.
6. All degree programmes are offered exclusively as full-time programmes.
7. The programmes Biology, Chemistry, Computing Science and Molecular Life Sciences are taught in English. The other programmes have components in English. An overview of this is provided in Article 7.2.

Article 1.2 Executive Board Guidelines

1. In view of the organisation and coordination of the provisions in these regulations, the Executive Board has established the following guidelines: The guidelines can be found in the Appendix:
 - a. Guideline for regulations on academic distinctions;
 - b. Guideline for BSA.

This is a translation of the Dutch EER. No rights can be derived from this document.

2. In addition to the above guidelines, the Executive Board has established a number of temporary guidelines for the 2021–2022 academic year in response to the coronavirus measures. These guidelines are available at <https://www.ru.nl/nieuws-agenda/nieuws/coronavirus-radboud-universiteit/coronarichtlijnen/>.

Article 1.3 Definition of terms

1. The terms used in these EER, which are also used in the Higher Education and Research Act (Wet op het hoger onderwijs en wetenschappelijk onderzoek, hereinafter, 'the Act') will have the same meaning as in the Act.
2. Apart from the terms referred to in clause 1, the terms below are understood to have the following meanings:
 - a. Degree programme: the Bachelor's programme referred to in Article 7.3a paragraph 1 of the Act;
 - b. Component: an educational unit as referred to in Article 7.3 paragraphs 2 and 3 of the Act;
 - c. Student: anyone enrolled at Radboud University for participation in a degree programme or in the partial examinations or final examinations of a programme;
 - d. Academic year: the period from 1 September in a given year until 31 August of the following year;
 - e. Practical: a practical exercise as referred to in Article 7.13 clause 2 under D of the Act;
 - f. Interim examination: an examination testing the knowledge, understanding or skills of the student in relation to a certain unit of study, as well as the assessment of the results of this examination, which is administered by at least one examiner designated by the Examining Board.
 - g. Partial examination: an examination of the knowledge, insight and skills of the student, as well as the assessment of the results of the examination, which, in conjunction with one or more other partial examinations, constitute the interim examinations as referred to under clause f. In these regulations, when the term 'examination' is used, this can also be read as 'partial examination', unless explicitly indicated otherwise;
 - h. Resit: a new opportunity to retake a particular examination as referred to in Article 7.10 clause 1 of the Higher Education and Research Act (WHW). In these regulations, when the term 'examination' is used, this can also be read as 'resit', unless explicitly indicated otherwise;
 - i. Final examination: an assessment, on the basis of which the Examining Board determines whether all the components pertaining to the Bachelor's programme have been completed successfully. The Examining Board may decide that the final examination also includes an investigation by the Examining Board into the knowledge, insight and skills of the candidate, as well as the assessment of the outcomes of that investigation (in accordance with Article 7.10 WHW);

This is a translation of the Dutch EER. No rights can be derived from this document.

- j. Fraud: any behaviour or negligence on the part of the student that, by nature, is directed toward making it partly or entirely impossible to properly assess the knowledge, insights and skills of the student or of another student. The Regulations on Fraud during Interim Examinations and Examinations are included as an appendix to these EER;
- k. Examining Board: the examining board of a degree programme, established in accordance with Article 7.12 of the Act. Also see the Radboud University Structural Regulations;
- l. Examiner: the person designated by the Examining Board to administer the interim examinations, in accordance with Article 7.12 of the Act;
- m. EC: European Credits, i.e. the study load unit in accordance with the European Credit Transfer
- n. System;
- o. Work day: Mondays to Fridays, with the exception of official holidays and any other days designated by Radboud
- p. University as collective holidays;
- q. Awarding of the degree certificate: the formal confirmation that all the examination requirements have been met;
- r. Prospectus: the guide for a particular degree programme of the Faculty of
- s. Science, containing specific information for the Bachelor's programme;
- t. The University: Radboud University;
- u. The faculty: The Faculty of Science;
- v. The education institute: the organisational unit responsible for the degree programme;
- w. Minor: a cohesive selection of components;
- x. Free elective: a freely-selected, academic, assessable component;
- y. Dual Bachelor's programme: excellence programme in which students take two Faculty of Science Bachelor's programmes simultaneously;
- z. Rules and regulations: the rules in which the Examination Board explain how it works in accordance with the Education and Examination Regulations.

PART II GENERAL PART

Section 2. Admission to the degree programme and education

Article 2.1 Admission and admission requirements

1. To be admitted to the programme, students must meet the statutory (additional) prior education requirements set out by the Act.
2. Decisions regarding admission are made by the education institute on behalf of the dean.
3. The programme-specific part of these EER lists the admission requirements students must meet to be admitted to the degree programme.

Article 2.2 Substitute requirements for insufficient prior education

Students who have pre-university education diplomas that do not meet the prior education requirements referred to in Article 2.1, may still enrol, with due observance of the provisions of Article 7.25 paragraph 5 of the Act, on the condition that comparable requirements have been met in terms of content, subject to further assessment. Assessment procedures and requirements are outlined in the programme-specific part of these regulations.

Article 2.3 Language requirements

1. A sufficient command of Dutch is required to participate in the programme and to sit examinations in Dutch. Non-Dutch students have met the language requirement for sufficient proficiency in Dutch if they have passed the state examination of Dutch as a second language, level 2.
2. In certain cases, the education institute may assess whether a student is sufficiently proficient in Dutch.
3. A sufficient command of the English language is required to participate in the programme and to sit examinations in English. This requirement is met if the student:
 - a. comes from one of the following countries: Australia, Canada (with the exception of Quebec), Ireland, New Zealand, Singapore, the United Kingdom, the United States or South Africa; or
 - b. is in possession of a pre-university education (VWO) diploma; or
 - c. is in possession of a pre-university education diploma obtained at an English-language institution in the Netherlands or elsewhere; or
 - d. has a pre-university education diploma obtained at a German secondary education institution, with English as *Grundkurs*; or
 - e. has a Bachelor's diploma from a university of applied sciences (HBO); or
 - f. has a Bachelor's diploma from a Dutch university; or
 - g. meets the requirements in the opinion of the programme; or
 - h. has achieved a sufficient score on one of the following English language tests:
 - i. the TOEFL with a score of 575 or higher for the paper version;

This is a translation of the Dutch EER. No rights can be derived from this document.

- ii. the TOEFL with a score of 90 or higher for the Internet version with none of the sub-scores below 20;
- iii. the IELTS with a score of 6.5 or higher, where none of the sub-scores are below
- iv. 6.0;
- v. the Cambridge CAE or CPE with a score of C or higher.

Section 3. Structure and design

Article 3.1 Final examination, degree and distinctions

1. All Bachelor's programmes conclude with a Bachelor's examination.
2. Students who pass the examinations of the Bachelor's degree programme will be awarded a Bachelor of Science (BSc) degree.
3. The degree referred to in the second clause is exclusively awarded if the student has earned at least half of the EC for their degree programme at this University.
4. The Examining Board can award distinctions to students who have successfully passed the degree programme examination. The rules for awarding distinctions can be found in Article 4.7 of these EER.

Article 3.2 General learning outcomes

1. The degree programme has the following learning outcomes for students:
 - a. Acquire knowledge, skills and insights in the relevant field of study;
 - b. Develop academic competences;
 - c. Prepare for further study or a future career.
2. Students who have completed one of the faculty Bachelor's programmes, as referred to in Article 7.10a paragraph 1 of the Act, shall be granted unconditional admission to at least one of the Master's programmes at the University.

Article 3.3 Curriculum

1. The degree programme-specific part of these regulations describes all the components that make up the degree programme.
2. For each section, the lecturer must make a course guide available prior to the course, which includes a description of the course, tests with weighting factors and deadlines. This guide may coincide with the course description in the study guide.
3. The Bachelor's programmes include a component with a study load of 3 EC for the purpose of reflecting on study performance and planning, as well as boosting the development of academic skills.
 - a. A condition for obtaining the course credits (EC) mentioned above is participation in the Academic Language Proficiency course and the corresponding test in the first year of the programme. This does not apply to students who have already completed the course and associated test at Radboud University.

This is a translation of the Dutch EER. No rights can be derived from this document.

- b. Completion of the Academic Language Proficiency test with a passing grade is not required. A resit for the language test is possible if desired by the student.
4. The degree programme includes a free elective component with a minimum study load of 6 EC. The elective courses cannot have substantial overlap in content with courses from the mandatory component. Courses that overlap with the elective courses within the mandatory programme or in the minor component are not allowed either.
5. Every programme has a minor component of at least 15 EC in which students can participate in at least one minor.
6. If a minor is not accessible to students of a specific Bachelor's programme, this is mentioned in the programme-specific part of these EER.
7. The minors offered by Radboud University can be found in the study guide. The approval of the Examination Board must be requested if a student wants to do a minor that is not offered by Radboud University. This minor will be labelled as a 'free minor' and needs to meet the following requirements: The minor encompasses at least 15 EC and at most 30 EC;
8. The minor is thematically coherent;
9. There should be no substantial overlap with other parts of the Bachelor's degree programme.
10. The degree programme also includes one or more components of a philosophical nature, in total amounting to at least 3 EC, as well as a writing skills component of 3 EC.
11. Finally, the degree programme includes an individual final aptitude test (hereinafter referred to as the 'Bachelor's thesis') with a study load of 12 EC.
12. In addition to the provisions of paragraph 8, the Bachelor's thesis can be expanded. In all cases where expansion is possible, this will be stated in the programme-specific part of these EER.
13. The composition of the Bachelor's programme compiled by the student must be presented for approval to the Examining Board no later than three months before the expected examination date. The Examination Board will decide whether to grant approval within a month of receiving the submitted programme.
14. Students are permitted to add components to the examination programme. These components are considered extracurricular and do not count towards the determination of a distinction.
15. If a student has a choice between components within the curriculum and the student has passed more than one of these components, then the student can decide which components will count toward their distinction.

Article 3.4 Sequence of education and interim examinations

1. Students may not start the final aptitude assessment (Bachelor's thesis) before obtaining a minimum of 120 EC of the degree programme, including the components of the first year.
2. The programme-specific part of these EER may contain further criteria for the order in which components may be taken and the related interim examinations.

Article 3.5 Types of interim examination

This is a translation of the Dutch EER. No rights can be derived from this document.

1. Each component of the degree programme is concluded by an interim examination. Interim examinations may comprise more than one modular partial examination, and may consist of the following assessment forms:
 - a. Written test and/or
 - b. Oral test;
 - c. Presentation;
 - d. Skill test;
 - e. The creation of a discipline-specific product and/or assignment.
2. Prior to the commencement of the academic year, information will be provided in the study guide for each individual component regarding the way in which the interim examinations will be administered. At the request of the student or the examiner, the Examination Board may allow an interim examination to be administered in a form other than stated above, if this is not to the detriment of the student.
3. In cases where components have admission requirements, the admission requirements will be published in the prospectus before the start of the academic year, also see Article 3.4 paragraph 2. This requires permission from the programme coordinator. Contrary to the above provisions, the admission requirements for the courses completed in the fourth period may still be changed up until the start of the second period, with permission from the programme coordinator.
4. There are no admission requirements for interim examinations; if students are enrolled in a component, they are admitted to all sub-components, including the interim examination.
5. Students with disabilities are given the opportunity to take interim examinations in a manner appropriately suited to their disability. The Examining Board, if necessary, shall seek expert advice and counsel prior to reaching its decision. If the students in question require certain facilities for their interim examinations, they must request these from the Education and Examination Administration of the faculty no later than two weeks before the interim examination.
6. During oral examinations, no more than one person is tested at a time, unless decided otherwise by the Examination Board.
7. An oral interim examination is not public, unless the Examining Board has deemed otherwise in exceptional cases. All oral examinations are recorded. A second examiner or a designated observer may be present as an alternative to recording.

Article 3.6 Exemptions

1. At the request of the student and having heard the examiner involved, the Examination Board may exempt the student, either partially or fully, from sitting for an interim examination if the student:
 - a. Has completed a course in a relevant subject at a university or institute of higher vocational education (HBO);
 - b. Demonstrates that they have adequate knowledge and skills regarding the component in question as a result of relevant work experience or professional experience.

This is a translation of the Dutch EER. No rights can be derived from this document.

2. If the degree programme allows group exemptions, then these are included in the programme-specific part of these regulations.
3. Only one grade for each course may be registered for a single degree programme. If a course is also part of another examination programme, this course will be listed on the diploma as an exemption.
4. Students who were first enrolled after 1 September 2017 can never have more than 70 EC of exemptions, as stated in paragraph 1.
5. All results for a degree programme achieved before the date of the first enrolment are stated as exemptions on the degree programme's diploma. These exemptions do not count towards the 70 EC if the courses are only included in one examination programme, as stated in clause 4.
6. Exemptions as referred to in clause 1 cannot be granted for the Bachelor's thesis.
7. As an exception to the provision in paragraph 6, students who do dual Bachelor's programmes can receive exemptions for a Bachelor's thesis if they completed a Bachelor's thesis for another programme within the Faculty of Science.

Article 3.7 Term of validity of successfully completed interim examinations

1. The term of validity of successfully completed interim examinations is unlimited.
2. Results obtained for interim examinations are valid until the end of the academic year at least. The lecturer can decide to extend the term of the validity for the result of interim examinations.

Article 3.8 Elective programmes

The programme Examination Board shall decide on a request for authorisation to follow a free education programme as referred to in Article 7.3d WHW. The Examination Board will verify whether the programme fits within the domain of the degree programme under the authority of the Examination Board, whether it is sufficiently cohesive and whether the level is adequate in the context of the programme's exit qualifications.

Section 4. Testing

Article 4.1 Frequency of interim examinations

1. Students are given the opportunity to take the examinations at least twice per academic year per interim examination.

This is a translation of the Dutch EER. No rights can be derived from this document.

2. Contrary to the provisions of paragraph 1, a degree programme coordinator may decide to only offer one opportunity for an interim examination or partial examination. If only one opportunity is given to take an interim examination or partial examination, this is stated in the programme study guide before the start of the academic year.
3. Notwithstanding the provisions in the first clause, there will be at least one opportunity in the following year to take an interim examination for a course that was taught for the final time in a particular academic year.
4. If a certain component is not given in a particular academic year, the opportunity to take the corresponding examination will be offered once in that academic year, as long as the interim examination is administered in written or oral form.

Article 4.2 Registration for course examinations

1. Students who register through Osiris for a component are automatically registered for the first interim examination opportunity in the relevant academic year. This does not apply to students whose enrolment in the degree programme has not yet been completed.
2. Students can register for an examination right up until 23:59 on the day prior to a period of five working days before the date of the examination. Registration is no longer possible after this date, unless the head of Education Centre decides otherwise in special cases on behalf of the dean. A successfully passed examination may be taken again.
3. If a student resits an interim examination, the most recent result will determine the final result.

Article 4.3 Confirmation of examination results

1. The result of an interim examination is determined by an examiner in the form of a grade on a scale of 1 to 10 (with 10 being the highest possible grade), consisting exclusively of whole numbers or half numbers. However, a grade of 5.5 is never given. When rounding off between 5 and 6, the rule is that a grade lower than 5.5 is rounded down to a five (5), which is an insufficient grade, meaning the educational component has not been successfully completed; a 5.5 and higher is rounded up to a six (6), meaning that the educational component has been successfully completed. In addition to results in the form of a grade, the assessments 'completed', 'not completed', 'satisfactory', 'not satisfactory', and 'good' may also be awarded.
2. Notwithstanding the provisions of clause 1, partial examinations may also be graded with one decimal point on a 10-point scale. Only the final grade is rounded off.

Article 4.4 Publication of results

1. The examiner shall determine the result of the final project of the Bachelor's programme within 15 working days of the presentation of the final Bachelor's project has transpired and after submission of the final Bachelor's project in <http://thesissubmission.science.ru.nl>. The examiner

This is a translation of the Dutch EER. No rights can be derived from this document.

will determine the result of an interim examination within ten working days of the date it was administered for interim examinations in the first year of the degree programme, and within 15 working days for interim examinations in the other years of the degree programme. Here, the precondition applies that there must be at least ten working days between the date of the publication of the result in Osiris and the date of the resit.

2. Contrary to the provisions in paragraph 2, the examiner shall determine the result of an interim examination in the fourth period no later than nine days before the scheduled date of the corresponding resit. The lecturer always has at least five working days after the written examination to determine the result.
3. Contrary to the provisions set out in paragraph 2, the examiner shall determine the result of an oral examination within two working days of the date it was administered.
4. In special cases, the Examination Board may extend the term in which the result must be determined as referred to in paragraph 2 and 3 by a maximum of ten working days. This is not possible for the interim examinations in the second period of the first year and for the interim examinations in the fourth period.
5. In this statement of the result of an interim examination, the student is also informed of their right to inspection, referred to in Article 4.5 as well as the right to appeal to the Examination Appeals Board.
6. Students may submit an appeal of a decision by the Examination Board to the Examination Appeals Board within six weeks.

Article 4.5 Right of inspection and explanation

1. Students may request access to review and inspect all graded work within at least 30 working days following publication of a written interim examination result. For the results of interim examinations with 'open' questions, at their request, the student shall be granted a copy of their graded work at cost.
2. During the period referred to in paragraph 1 of this Article, any student who has taken an interim examination may review the questions and assignments of the interim examination in question, as well as the standards on which the result was based.
3. Students must be offered at least one opportunity to inspect or have their examinations explained, as referred to in paragraphs 1 and 2. If the student demonstrates that they are or were unable to attend an inspection, they may request the Examination Board to allow them another opportunity to inspect the examination, within the period referred to in the first paragraph if possible. In all cases, the inspection must take place at least five working days before the resit of an interim examination. For examinations in the fourth period, students may view their work until one working day before the resit.

This is a translation of the Dutch EER. No rights can be derived from this document.

4. The examiner shall retain all written interim examinations and related papers (assignments or otherwise) that count towards the final result for a period of two years following the date when the examination was administered. Bachelor's programme reports and theses must remain available for visitations, accreditations and inspections, and shall be kept for seven years.

Article 4.6 Confirmation of examination results

1. Students are given the opportunity to take the final examination after they have provided sufficient proof of passing the components leading up to the final examination.
2. Examinations are scheduled each month.
3. The Examining Board will determine the result of the final examination, as well as the rules in relation to the manner in which the result of the examination is determined. The result of the examination is determined by the Examining Board within five weeks following the student's request. If the examination takes place in July, the results will be determined no later than 31 August. Where needed in relation to entry requirements for a subsequent programme or the acceptance of a job, a statement can be released indicating that the student has met the requirements of the examination within five days. This is only possible if the student meets the criteria specified in clause 1.
4. Prior to determining the result of the final examination, the Examination Board may evaluate and assess the student's knowledge with respect to one or more components or aspects of the programme, if and to the degree to which the results of the related interim examinations justify this.

Article 4.7 Awarding distinctions

The guidelines concerning distinctions can be found in the Appendix of the Guideline for Distinction Regulations.

Section 5. Study performance, guidance, counselling and evaluation of education

Article 5.1 Study performance and support

1. The faculty dean is responsible for recording student results in such a way that, upon request, the Examination Board can respond by providing the student with an overview of the progress of the study programme within a reasonable time frame.
2. The dean is responsible for providing adequate student counselling.

Article 5.2 Binding study advice regulations

This is a translation of the Dutch EER. No rights can be derived from this document.

1. On behalf of the dean, the First-year Study Advice Committee (Commissie Studieadvies Eerste Jaar) will advise students on continuing their degree programme. This will occur at the end of the first year, but no later than 31 August, assuming the student has been registered for the full-time Bachelor's programme as referred to in Article 7.8b of the Act.
2. The First-year Study Advice Committee shall issue positive advice to students who have completed at least 39 EC of the first-year curriculum.
3. The First-year Study Advice Committee will issue negative advice to students if they do not meet the requirements referred to in paragraph 2, unless one or more of the (personal) circumstances, as referred to in Article 5.4 of these regulations, are applicable.
4. In case of a binding rejection, the First-year Study Advice Committee shall formulate a plan to inform the student of negative binding study advice and provide the student with the opportunity to be heard before the binding study advice is issued.
5. Exempted credits are counted in determining whether the required credits referred to in paragraph 2 have been achieved.
6. If students have registered for a full-time programme after 31 January, the First-year Study Advice Committee will give binding study advice at the end of their second study year. The First-year Study Advice Committee will give positive advice to students if all components from the first year are concluded successfully.
7. Students who switch degree programmes after 31 January, within the Bachelor's programmes Chemistry, Molecular Life Sciences and Science will receive the binding study advice as referred to in paragraph 1 at the end of the first academic year.
8. Students who terminate their enrolment before 1 March will not receive binding study advice. If they re-enrol for the same programme in the following academic year, they will receive binding study advice at the end of the relevant academic year. The provisions of the second sentence of paragraph 6 apply accordingly.
9. A student may appeal negative binding study advice with the Examination Appeals Board within six weeks. The appeal does not suspend the validity of the binding study advice.

Article 5.3 Preliminary recommendations

1. In anticipation of the advice referred to in Article 5.2, the First-year Study Advice Committee will issue preliminary study advice at the end of the first semester (no later than 28 February) on the basis of the results of the student to date.
2. The preliminary study advice is intended as a warning for students who have failed to make adequate progress. The students in question will be invited for an interview with the student advisor to discuss how their study results could be improved on or what other alternative programmes would suit them better.

Article 5.4 Special (personal) circumstances

This is a translation of the Dutch EER. No rights can be derived from this document.

1. The First Year Study Advice Committee shall take into account special (personal) circumstances in their decision on binding study advice, as stated in Article 2.1 of the Act's Implementation Decree, insofar as these circumstances have been reported to the student advisor, a student dean or another designated person by the student or by someone else on behalf of the student. The student may be asked to further substantiate or justify claims of personal circumstances.
2. Only the circumstances mentioned in or supported by the Act are eligible under special (personal) circumstances.

Article 5.5 Duration of the period of rejection

1. Students who have received negative binding study advice may not re-enrol in the relevant Bachelor's programme for a period of three years, or for any other Bachelor's programmes that the dean has determined fully or partially share the first year. In any case, this concerns the Bachelor's programmes in Chemistry, Molecular Life Sciences and Science.
2. In the event that a student registers again for the degree programme after the period referred to in paragraph 1, this registration will be considered to be the first registration for the purposes of this section.

Article 5.6 No negative binding study advice or deferral of the decision

1. On the basis of the circumstances referred to in Article 5.4 of these regulations, the dean, having heard the First Year Study Advice Committee, may decide not to attach a binding rejection to the negative study advice. Having heard the Committee on Binding Study Advice for First-Year Students, the dean may also decide to not attach a binding rejection to the negative study advice for the time being.
4. If negative study advice is not yet subject to a binding rejection pursuant to paragraph 1, the First Year Study Advice Committee will issue a binding rejection, as stipulated in Article 5.2, before the end of the second study year if, by that time, the student has yet to obtain the 60 EC from the first year.

Article 5.7 Method of evaluating education

In compliance with the quality assurance system of the university as described in the Handboek Kwaliteitszorg Onderwijs Radboud Universiteit (Radboud University Quality Assurance Manual), the dean shall ensure that the education of the degree programmes is systematically evaluated.

PART III PROGRAMME-SPECIFIC PART

Section 6. Admission to the degree programme and education

Article 6.1 Substitute requirements for insufficient prior education

1. Deficiencies in prior education, as referred to in the general provisions of these EER, are compensated through the successful completion, as deemed by the degree programme, of yet-to-be-determined tests at the level of the VWO (pre-university education) final examination: Physics, Chemistry and Mathematics B.
2. The degree programme will appoint one or more examiners with the responsibility of administering the test(s) referred to in paragraph 1.

Article 6.2 Equivalent prior education

The diploma from prior education obtained abroad or from an international or European Baccalaureate will be assessed by the degree programme in regard to the presence and level of the subjects Physics, Chemistry and Mathematics B.

Article 6.3 Colloquium doctum

The admission assessment, referred to in Article 7.29 of the Act, is in relation to the following courses at the stated level: pre-university education (VWO) final examination level in Mathematics B, Chemistry, English, and Physics.

Article 6.4 HBO first year

Admission on the basis of an HBO first year is only allowed if certificates at VWO level or equivalent have been obtained in the following school subjects: physics, chemistry, mathematics B, and English.

Section 7. Structure and design

Article 7.1 Programme-specific learning outcomes

In addition to the general learning outcomes described in the general part of these EER, the Molecular Life Sciences degree programme aims to achieve the following learning outcomes.

Bachelor's programme	Molecular Life Sciences
Knowledge and understanding	<ul style="list-style-type: none">• the major types of organic chemical reactions/mechanisms and the main characteristics associated with them;• the principles of quantum mechanics and their application to the description of the structure and properties of atoms and molecules;• the nature and behaviour of functional groups in organic molecules;
	<ul style="list-style-type: none">□ the principles of thermodynamics and their applications to molecular life sciences;

This is a translation of the Dutch EER. No rights can be derived from this document.

	<ul style="list-style-type: none"> <input type="checkbox"/> the structure and reactivity of important classes of biomolecules and the chemistry of important biological processes; <input type="checkbox"/> the building of living cells, the biological function of cellular structures, components and biomolecules and the interactions between biomolecules in health and disease; <input type="checkbox"/> the properties and physiology of micro-organisms; <input type="checkbox"/> the principal techniques of biochemical and molecular genetic investigations;
Applying knowledge and understanding	<ul style="list-style-type: none"> <input type="checkbox"/> The capacity to apply concepts from chemistry and physics, handle and derive formulas, do calculations, analyse and solve theoretical problems in the fields of organic and chemical biology, physical chemistry, thermodynamics, biophysics and spectroscopy; <input type="checkbox"/> The capacity to apply mathematical knowledge, methods and techniques from linear algebra and calculus and use relevant software to solve mathematical problems, in the domain of the molecular life sciences; <input type="checkbox"/> The ability to explain the relationships between structure and reactivity of molecules and apply concepts and theories in synthesis, catalysis, biochemistry and molecular biology; <input type="checkbox"/> Information-management competences, in relation to primary and secondary information sources, including information retrieval through online internet searches; <input type="checkbox"/> Execute (under supervision) simple scientific experiments in the various fields of molecular life sciences including analytical, physical and organic chemistry, biochemistry, molecular biology, biophysics and spectroscopy, test hypotheses and analyse and interpret own experimental data in relation to data presented in literature and on the internet; <input type="checkbox"/> Resolve (under supervision) a pre-defined research question in the field of molecular life sciences into verifiable research; <input type="checkbox"/> Develop and execute (under supervision) a research plan in at least one of the domains of the molecular life sciences in which research question, describe hypotheses, experimental set-up and data analysis in relation to relevant literature; <input type="checkbox"/> Skills in planning and time management;
Making judgements	<ul style="list-style-type: none"> <input type="checkbox"/> Demonstrate academic conduct by generating and recognising creative ideas and recognising limits of scientific knowledge; <input type="checkbox"/> Ability to include safety, environmental, ethical and societal considerations that are intrinsically related to being active in the molecular-sciences domain when making decisions;
Communication	<ul style="list-style-type: none"> <input type="checkbox"/> Process, present and discuss results of learning and collected data, both orally and in writing; <input type="checkbox"/> Participate in multi-disciplinary teamwork and discussions with other people;
Lifelong learning skills	<ul style="list-style-type: none"> <input type="checkbox"/> The ability to reflect upon personal knowledge, skills, attitudes and functioning, both individually and in discussions with others; <input type="checkbox"/> The ability to design and plan their own learning path including making a well-founded choice for a follow-up master programme or a position in the labour market.

This is a translation of the Dutch EER. No rights can be derived from this document.

Article 7.2 Programme language

The language of instruction of the Bachelor's programme is English and the examinations and interim examinations are administered in English. Notwithstanding the above provision, elective courses that are (also) part of a different degree programme may be taught in Dutch.

The course NWI-FCEM02B Writing about Science is taught both in Dutch (Schrijven over Wetenschap) and in English.

Article 7.3 Composition of the first year

Subject to the general part of these EER, the degree programme consists of the following components:

1. Compulsory components (60 EC):

Course code	Course name	EC
NWI-MOL120	Structure of Atoms and Molecules	3
NWI-MOL121	Chemical Analysis 1	3
NWI-MOL123	Chemical Analysis Lab	3
NWI-MOL124	Organic Chemistry 1	6
NWI-MOL125	Synthesis Lab 1a (previously: Essentials of Organic Chemistry Lab)	3
NWI-MOL127	Biochemistry	6
NWI-MOL129	Biochemistry Lab	6
NWI-MOL003	Mechanics 1	3
NWI-MOL014	Electricity and Magnetism 1	3
NWI-MOL131	Mathematics	9
NWI-MOL135	Thermodynamics (previously: Physical Chemistry 1)	3
NWI-MOL137	Cell Biophysics	6
NWI-MOL139	Sustainable Chemistry	3
NWI-MOL140	Molecular Sciences Lab	3
NWI-MOI0861	Academic Skills first year	0
NWI-RADAR-EN	RADAR: Academic Language Proficiency	0

This is a translation of the Dutch EER. No rights can be derived from this document.

5. Substitute first-year programme

The first year of the degree programme is also the first year of the Radboud University degree programme Chemistry and Science, with the understanding that, in the Bachelor's programme Molecular Life Sciences, at least the following courses are included: NWI-MOL128 Essentials of Biochemistry Lab and NWI-MOL139 Sustainable Chemistry. If a student has enrolled during or before the 2018–2019 academic year, the first-year programme of the Chemistry programme can also be used as a replacement for the first-year programme. The same provision applies to the Science degree programme, provided it includes NWI-MOL005 or NWI-MOL006 Reactions and Kinetics Project, or provided this project is included in the elective space of the degree programme.

Article 7.4 Composition of the second and third year

1. Compulsory components (45 EC)

Course code	Course name	EC
NWI-MOL027	DNA Technology	3
NWI-MOL150	Data: Programming and Statistics	6
NWI-MOL032	Crystal Structure	3
NWI-MOL158	Biomolecules at Work	6
NWI-MOL161	Organic Chemistry 2	3
NWI-MOL122	Chemical Analysis 2	3
NWI-MOL152	Data: Bioinformatics	3
NWI-MOL086	Academic Skills	3
NWI-MOL172	Inorganic Chemistry in Biological Systems	3
NWI-MOL170	Panorama Science & Society 1	6
NWI-FCEM02B	Writing about Science	3
NWI-FFIL101 or: NWI-FFIL100	Introduction to Philosophy and Ethics	3

2. Differentiation phase (51 EC)

- i) Optionally a minor as described in Article 3.3 paragraph 4

This is a translation of the Dutch EER. No rights can be derived from this document.

ii) At least 18 EC from courses in the list below

Course code	Course name	EC
NWI-BB017C	Advanced Molecular Biology (previously: Biochemistry, Molecular Biology II)	6
NWI-BB019B	Immunology	6
NWI-BB094	Neurons and Synapses	6
NWI-MOL054	Toxicology	6
NWI-MOL126	Synthesis Lab 1b	3
NWI-MOL113	Nanomaterials in Biomedicine	3
NWI-MOL163	Synthesis Lab 2	6
NWI-MOL167	Comparative Physiology	6
NWI-BB047C	Medical Embryology	6
NWI-BB048B	Endocrinology	6
NWI-BB064B	Functional Genomics	6
NWI-MOL095	Organic Chemistry 3	6
NWI-MOL055	Molecular Basis of Diseases	6
NWI-BB087	Population and Evolutionary Biology	6

iii) Other programme-specific options must be filled with courses from the natural science domain including mathematics, computer science, and (bio)medical sciences; education offered by Radboud University is approved provided there is no overlap with other courses in the programme.

When completing the differentiation phase, students must take into account the admission requirements of future Master's degree programmes.

3. Free electives (6 EC)

The degree programme includes a free elective component with a minimum study load of 6 EC, to be filled with assessable courses at the academic level.

4. Bachelor's internship (12 EC)

This is a translation of the Dutch EER. No rights can be derived from this document.

A final aptitude test (practical work and a report) with a study load of 12 EC. Every year, the degree programme publishes a list of approved internship departments for each specialisation.

Article 7.5 Composition of the second and third year for students who started before 2019

As an alternative to the programme described in Article 7.4, the second and third year may also be completed as follows:

1. Compulsory components before 2019 (39 EC)

Course code	Course name	EC
NWI-MOL027	DNA Technology	3
NWI-MOL028	Statistics	3
NWI-MOL031	Biochemistry in the Living Cell	3
NWI-MOL032	Crystal Structure	3
NWI-MOL036	General Physiology	3
NWI-MOL037	Molecular Life Sciences and Society	3
NWI-MOL038	Genetics	3
NWI-MOL075	Bioinformatics A	3
NWI-MOL076	Programming: Matlab	3
NWI-MOL086	Academic Skills	3
NWI-MOL105	Inorganic Biochemistry	3
NWI-FCEM02B	Writing about Science	3
NWI-FFIL101 or: NWI-FFIL100	Introduction to Philosophy and Ethics	3

2. Differentiation phase before 2019 (63 EC)

A: If no minor is selected, the differentiation phase will consist of:

- i. 57 EC of courses from the lists BM1 and BM2, with at least 42 EC selected from the below BM1 list.
- ii. 6 EC worth of space to be filled with assessable natural science courses at the academic level.

This is a translation of the Dutch EER. No rights can be derived from this document.

B. If a minor programme is selected as referred to in Article 3.3 paragraph 4, the differentiation phase will consist of:

- i. a minor programme
- ii. differentiation courses selected from the following list of priority courses BM1 and from the list of other elective courses BM2, with the condition that the percentage of EC for priority courses in relation to the total number of EC for differentiation courses is at least 75%, with the understanding that a priority course load of 33 EC will suffice for a minor of 18 EC.

BM1 list: Priority courses Bachelor's in Molecular Life Sciences. Not all courses are taught every year.

Course code	Course name	EC
NWI-BB017C	Advanced Molecular Biology	6
NWI-BB019B	Immunology	6
NWI-BB023B	Animal Cell Biology (not offered since 2020–2021)	6
NWI-BB034B	Neurobiology (will not be offered from 2019–2020 onward)	6
NWI-BB063B	Neuroscience (will not be offered from 2019–2020 onward)	6
NWI-BB064B	Functional Genomics	6
NWI-BB080B	Neurophysiology of Cognition and Behaviour	6
NWI-BB084B	Molecular Principles of Development	6
NWI-BB086	Genomics for Health and Environment (6 EC are intended as priority course, 6 EC as other elective course)	12
NWI-BB092	Neural basis of Cognition and Perception	6
NWI-BB094	Neurons and Synapses	6
NWI-MOL047	Synthesis of Biomolecules (not offered since 2019–2020)	3
NWI-MOL049A	Chemical Biology Project	6
NWI-MOL053	Pharmacology	6
NWI-MOL054	Toxicology	6
NWI-MOL055	Molecular Basis of Diseases	6
NWI-MOL066	Structure, Function and Bioinformatics	6
NWI-MOL073	Comparative Genomics	3

This is a translation of the Dutch EER. No rights can be derived from this document.

NWI-MOL078	Nanobiotechnology	6
NWI-MOL095	Organic Chemistry	6
NWI-MOL100	Spectroscopy of Biomolecules	3
NWI-MOL104	Medical Biotechnology	6
NWI-MOL107	RNA Structure and Function	6
NWI-MOL109	Chemometrics for Molecular Life Sciences	6
NWI-MOL113	Nanomaterials in Biomedicine	3
NWI-MOL168	Biomolecular Architectures	6
NWI-BB047C	Medical Embryology	6
NWI-BB048B	Endocrinology	6
NWI-MOL111	Biophysical Chemistry	3

List BM2: Other elective courses Bachelor's in Molecular Life Sciences. Not all courses are taught every year.

Course code	Course name	EC
MED-MIN16	Translational Neurosciences	12
NWI-BB020B	Adaptation Physiology (not offered since 2019–2020)	6
NWI-BB021B	Neurobiophysics	6
NWI-BB024B	Physiology of Microorganisms	6
NWI-BB025B	Principles and Practice of Human Pathology	6
NWI-BB028B	History of Biology	3
NWI-BB032B	Biotechnology of Plants (will not be offered from 2019–2020 onward)	6
NWI-BB039C	Neurodevelopment	6
NWI-BB043B	Plant Genome Analysis	6
NWI-BB065B	Pathophysiology of the Kidney (is no longer offered)	6
NWI-BB081B	Cognitive Neuroimaging	6
NWI-BB085B	Brain and Behaviour (will not be offered from 2019–2020 onward)	6

This is a translation of the Dutch EER. No rights can be derived from this document.

NWI-BB086	Genomics for Health and Environment (6 EC are intended as priority course, 6 EC as other elective course)	
NWI-BB089	Quantitative Bioimaging	6
NWI-MB024B	<i>Humane en Ecologische risicobeoordeling</i> (HERA)	6
NWI-MOL016	Linear Algebra	3
NWI-MOL048A	Organic Chemistry Lab (if selected, NWI-MOL049A Chemical Biology Project may not be followed)	6
NWI-MOL065	Chemometrics (if selected, NWI-MOL109 Chemometrics for Molecular Life Sciences may not be followed)	6
NWI-MOL087	Advanced Synthesis Lab	6
NWI-MOL091	Green Chemistry	6
NWI-MOL093	Stereoselective Synthesis	3
NWI-MOL094	Physical Organic Chemistry	3
NWI-MOL096	Metal Organic Chemistry	3
NWI-MOL108	Magnetic Resonance in Chemistry	3
NWI-MOL110	Applied Magnetic Resonance	3

The below courses are mutually exclusive due to overlapping content:

Course code	Course name	EC
NWI-MOL033	Programming in Matlab	3
NWI-MOL076	Programming: Matlab	
NWI-MOL085	Programmeren Matlab voor NW	
NWI-MOL150	Data: programming and statistics	6
NWI-MOL028	Statistics	
NWI-MOL150	Data: programming and statistics	
NWI-MOL041	Quantum Mechanics 1	3
NWI-MOL100	Spectroscopy of Biomolecules	
NWI-NB013C	Kwantummechanica 1	
NWI-MOL048A	Organic Chemistry Lab	6
NWI-MOL049A	Chemical Biology Project	
NWI-MOL163	Synthesis Lab 2	
NWI-MOL044	Inorganic Chemistry Lab	3
NWI-MOL163	Synthesis Lab 2	6

This is a translation of the Dutch EER. No rights can be derived from this document.

NWI-MOL063 and NWI-MOL109	Chemometrics Chemometrics for Molecular Life Sciences	6
NWI-MOL087 NWI-MOL087A/B (C)	Advanced Synthesis Synthesis Lab ((In)Organic)	6

3. Free electives (6 EC)

The degree programme includes a free elective component with a minimum study load of 6 EC, to be filled with assessable courses at an academic level.

4. Bachelor's internship (12 EC)

A final aptitude test (practical work and a report) with a study load of 12 EC. Every year, the degree programme publishes a list of approved internship departments for each specialisation.

Article 7.6 Unauthorised minors

The following minors cannot be used as part of the Molecular Life Sciences programme:

- Physical Organic Chemistry
- Bio-organic Chemistry
- Sustainable Chemistry

Section 8. Transitional provisions

The following transitional provisions apply: even if replacement courses differ in scope, the Bachelor's programme must always contain at least 180 EC.

Students will, in some cases, need to include an additional elective or one less elective in the programme.

For students who started before 2019, the reverse substitution also applies in the combinations listed below.

- NWI-MOL120 Structure of Atoms and Molecules (3 EC) may be replaced by NWI-MOL079 Structure of Atoms and Molecules (3 EC)
- NWI-MOL121 Chemical Analysis 1 (3 EC) and/or NWI-MOL123 Chemical Analysis Lab (3 EC) may be replaced by NWI-MOL001A Chemical Analysis (3 EC) or by NWI-MOL001 Chemical Analysis (3 EC)

This is a translation of the Dutch EER. No rights can be derived from this document.

- NWI-MOL122 Chemical Analysis 2 (3 EC) may be replaced by NWI-MOL019 Spectroscopic Techniques (3 EC)
- NWI-MOL124 Organic Chemistry 1 (6 EC) may be replaced by NWI-MOL080 Molecular Structure (3 EC) + NWI-MOL007 Reactions and Kinetics (3 EC)
- NWI-MOL125 Synthesis Lab 1a (3 EC) + NWI-MOL126 Synthesis Lab 1b (3 EC) may be replaced by NWI-MOL005 Reactions and Kinetics Project (6 EC)
- NWI-MOL127 Biochemistry (6 EC) may be replaced by NWI-MOL008A Biochemistry (6 EC) or by NWI-MOL008 Biomolecules (3 EC) + NWI-MOL013 Biochemical processes (3 EC)
- NWI-MOL128 Biochemistry Lab (6 EC) may be replaced by NWI-MOL010 Biochemistry Project (6 EC)
- NWI-MOL130 Physics 1 (6 EC) may be replaced by NWI-MOL003A Mechanics 1(A) (3 EC) (or NWI-MOL003 Mechanica 1B (3 EC) or NWI-NP001B Mechanica 1B) + NWI-MOL014 Electricity and Magnetism 1(A) (3 EC)
- NWI-MOL131 Mathematics (9 EC) may be replaced by NWI-MOL004 Mathematics 1 (3 EC) + NWI-MOL009A Mathematics 2-3 (6 EC) NWI-MOL009A Mathematics 2-3 (6 EC) may be replaced by NWI-MOL009 Mathematics 2 (3 EC) + NWI-MOL015 Mathematics 3 (3 EC)
- NWI-MOL135 Physical Chemistry 1/NWI-MOL135 Thermodynamics (3 EC) may be replaced by NWI-MOL017 Thermodynamics (3 EC)
- NWI-MOL139 Sustainable Chemistry (3 EC) may be replaced by NWI-MOL022 Aspects of Molecular Life Sciences (3 EC).
- NWI-MOL137 Cell Biophysics (6 EC) may be replaced by NWI-MOL021 Cell Biophysics Project (6 EC)
- NWI-MOL150 Data: programming and statistics (6 EC) may be replaced by NWI-MOL028 Statistics (3 EC) + NWI-MOL033 Programming in Matlab/NWI-MOL076 Programming: Matlab/NWI-MOL085 Programming in Matlab NW (3 EC)
- NWI-MOL152 Data: Bioinformatics (3 EC) may be replaced by NWI-MOL075 Bioinformatics A (3 EC)
- NWI-MOL158 Biomolecules at Work (6 EC) may be replaced by NWI-MOL031 Biochemistry in the Living Cell (3 EC) + NWI-MOL038 Genetics (3 EC)
- NWI-MOL161 Organic Chemistry 2 (3 EC) may be replaced by NWI-MOL047 Synthesis of Biomolecules (3 EC)
- NWI-MOL170 Panorama Science and Society 1 (6 EC) may be replaced by NWI-MOL037 Molecular Life Sciences and Society (3 EC) or by NWI-MOL035 Chemistry and Society (3 EC)
- NWI-MOL172 Inorganic Chemistry in Biological Systems (3 EC) may be replaced by NWI-MOL105 Inorganic Biochemistry (3 EC)

PART IV FINAL PROVISIONS

Paragraph 9. Final provisions

This is a translation of the Dutch EER. No rights can be derived from this document.

Article 9.1 Safety net scheme and hardship clause

1. In all cases not covered fully or clearly by these regulations, the decision lies with the dean.
2. In all cases in which these regulations may result in an unreasonable or unfair situation for individual students, the Examining Board or the dean is authorised to make an exception to the provisions in these Education and Examination Regulations.

Article 9.2 Establishment and amendments

1. Notwithstanding the provisions in Article 7 of the Structure Regulations, these regulations are drawn up or amended by the dean after receiving advice from the programme committees and after having obtained the approval of the Joint Assembly of the faculty.
2. An amendment to these regulations has no impact on the current academic year, unless this would disproportionately damage the interest of the students.
3. In derogation from clause 1, the dean is authorised to drop elective components of the curriculum should the circumstances be deemed impossible to offer the course.

Article 9.3 Entry into force

These regulations enter into force on 1 September 2021.

Article 9.4 Publication

1. The dean is responsible for publishing these regulations and any amendments thereto.
2. Interested parties may consult these regulations via the prospectus.

As established by the dean on 30-06-2021.
