GENERAL CONDITIONS OF USE FOR
THE IPROSLA DATA SETS OF SIGN LANGUAGE ACQUISITION
DEPOSITED AT THE LANGUAGE ARCHIVE

The person to whom The Language Archive makes one or more IPROSLA dataset files available (hereafter 'the Data User'), declares that he/she is in agreement with the following conditions of use.

1. Clear acknowledgement of sources
The user shall always include an acknowledgement of sources in the research results that he/she publishes, in whichever form, where use is made of digital data originating from one of the IPROSLA dataset. The acknowledgement of sources at least consists of the following:
- the name or names of the person(s) to whom, in accordance with the Databases Act (Databankenwet) and/or the Copyright Act (Auteurswet), the right of ownership to the dataset is registered: respectively Paula Fikkert, Onno Crasborn & Merel van Zuilen for IPROSLA Nijmegen and Anne Baker and Beppie van den Bogaerde for IPROSLA Amsterdam;
- the title of the dataset (respectively “IPROSLA Nijmegen” or “IPROSLA Amsterdam”)
- the period in which the dataset was created (respectively 1988-1996 for IPROSLA Amsterdam and 2008-2012 for IPROSLA Nijmegen);
- the unique and permanent digital identification of the dataset (persistent identifier), namely http://hdl.handle.net/hdl:1839/00-0000-0000-0016-3CDD-9. (At present, a friendly access to the content is presented at the non-persistent URL http://corpus1.mpi.nl/ds/imdi_browser?openpath=MPI1457373%23.)
The user shall also at all times state that the dataset originates from The Language Archive.
For instance, a footnote in a publication can contain the following text:
“The data used in this study are part of the IPROSLA Nijmegen dataset created and owned by Paula Fikkert, Onno Crasborn & Merel van Zuilen, distributed by the Language Archive with the unique identifier http://hdl.handle.net/hdl:1839/00-0000-0000-0016-3CDD-9.”

2. Archiving new datasets
The user who (partly) creates and publishes a new dataset with the aid of a dataset originating from the IPROSLA dataset such as transcripts or subtitled video clips of any kind, undertakes to also deposit this new dataset with The Language Archive.

3. Distribution of the dataset
The dataset may not, regardless of the form and/or medium, be further distributed or made public without the prior written consent of the depositing party.

4. Intended use of the dataset
The datasets may not be (re)sold or used for commercial purposes.

5. Personal data protection
IPROSLA consists of two datasets that contain personal information as referred to in the
Personal Data Protection Act (Wet Bescherming Persoonsgegevens), and may be used only for scientific research on language and communication. Persons who use datasets containing personal data are required to comply with the Code of Practice for the use of personal data in scientific and scholarly research (Gedragscode voor gebruik van persoonsgegevens in wetenschappelijk onderzoek) published by the VSNU (Association of Universities in the Netherlands) and attached to this document. The user undertakes to maintain confidentiality of all personal data that he/she processes.

6. Content liability
The Language Archive is in no way whatsoever liable for the content or accompanying documentation of the dataset. The Language Archive is not liable for substantive errors or for incorrect conclusions based on the data. The user is requested, however, to inform The Language Archive of any found errors immediately after discovery of these.

7. Non-compliance with the Conditions of Use
a. In the case of non-compliance with one of these Conditions of Use, the use of the dataset must be terminated immediately at the initial demand by The Language Archive. The Language Archive reserves the right to, in such an event, to inform the user’s employer. In the event of improper use of personal data, The Language Archive also has the right to inform the Dutch Data Protection Authority (College Bescherming Persoonsgegevens). These measures do not prejudice the competence of The Language Archive, in the event of non-compliance or insufficient compliance with these Conditions of Use, to bring an action against the user.
b. The user indemnifies The Language Archive against all claims other parties may bring against The Language Archive as a direct or indirect result of the fact that the user has not or has incompletely taken these Conditions of Use into consideration.

8. Compelling reasons
In the event of any compelling reasons, The Language Archive has the right to prohibit the further use of the dataset by the user.

9. Applicable law
Dutch law is applicable to this user agreement and these Conditions of Use.

Notice has been given of these Conditions of Use to the Personal Data Officer (Functionaris voor de Gegevensbescherming) of the Radboud University Nijmegen and the University of Amsterdam.
