Master Science
This EER consists of various parts:

PART I: General provisions

Part II: Provisions applicable to all Master’s programmes

Part III: Programme specific provisions

Appendices (2x)

Part I and II have a combined table of contents

Part III has a separate table of contents

These tables of content are to be found at the start of the various parts

PART I General provisions and PART II Provisions applicable to all Master’s programmes
Established August 29, 2016

PART I General provisions

Section 1 – General provisions

Article 1.1 – Applicability of these regulations

1. These Education and Examination Regulations (EER) apply to the Master’s degree programmes of the Faculty of Science and outline the applicable procedures, rights and obligations concerning teaching, interim examinations and course examinations. Part II of these EER lists the provisions applicable to all Master’s degree programmes of the Faculty of Science; Part III specifies the provisions applicable to each individual degree programme.

2. The present regulations apply to all students enrolled in a Faculty of Science degree programme for the first time in the academic year 2016-2017.

3. The faculty offers the following 120-EC Master’s programmes:
   a. Biology;
   b. Computing Science;
   c. Medical Biology;
   d. Molecular Life Sciences;
   e. Physics and Astronomy;
   f. Science;
   g. Chemistry;
   h. Mathematics.

   The faculty offers the following 60-EC Master’s programmes:
   i. Information Sciences.

4. All degree programmes are offered exclusively as full-time programmes.

Article 1.2 – Definitions

1. The terms used in these EER, which are also used in the Higher Education and Research Act (Wet op het hoger onderwijs en wetenschappelijk onderzoek, hereinafter, “the Act”) will have the same meaning as in the Act.

2. Apart from the terms referred to in paragraph 1, the following terms will be understood to have the following meaning:
   a. Fraud: any deliberate act or omission by a student that makes forming an accurate opinion of his or her knowledge, understanding and skills partially or entirely impossible.
   b. Degree programme: the Master’s degree programmes referred to in Article 7.3a, paragraph 1 of the Act;
   c. Study component: an educational unit as referred to in Article 7.3, paragraph 3 of the Act;
   d. Student: anyone enrolled at Radboud University for participation in a degree programme and/or in the courses or final examinations of a programme;
   e. Practical exercise: a practical exercise as referred to in Art. 7.13 paragraph 2 under d of the Act, in one of the following forms:
      i. Writing a thesis
      ii. Writing a paper or experimental design
      iii. Carrying out a design or research assignment
iv. Completing a literature review
v. Writing a computer program
vi. Completing an internship
vii. Participating in fieldwork or going on an excursion
viii. Conducting tests or experiments
ix. Participating in an additional educational activity to acquire certain skills;
f. Interim examination: an examination testing the knowledge, understanding and skills of the student in relation to a certain unit of study, as well as the assessment of this examination, which is administered by at least one examiner designated by the Examination Board;
g. Final examination: an examination of the student's academic achievements, in which the Examination Board determines whether or not all examinations that are part of the Master's programme have been successfully completed. The Examination Board may determine that this review requires a test of the candidate's knowledge, understanding and skills by the Examination Board itself and an assessment of the results of that test (in accordance with Article 7.10 of the Act);
h. Examination Board: the examination committee of a degree programme, established in accordance with Article 7.12 of the Act. Also see the Radboud University Structural Regulations;
i. Examiner: the person designated by the Examination Board to administer the interim examination, in accordance with Article 7.12 of the Act;
j. EC: European Credits, i.e. the study load unit in accordance with the European Credit Transfer System. One EC is equal to 28 hours of study;
k. Specialisation: a coherent programme within the Master's programme that has been approved as such by the faculty board;
l. Work day: Monday till Friday, with the exception of official holidays and any other days marked by Radboud University as collective holidays;
m. Awarding of the degree certificate: the formal confirmation that all the examination requirements have been met;
n. Study guide: the guide for a particular degree programme of the Faculty of Science, containing specific information for the Master's degree programme;
o. The University: Radboud University;
p. The faculty: The Faculty of Science
q. Free elective: a freely-selected, academic, testable component.

Part II Provisions applicable to all Master's programmes

Section 2 Access to the degree programme and education

Article 2.1 Admission and admission requirements

1. Decisions regarding admission are made by the Examination Board.
2. The programme-specific part of this EER lists the admission requirements the student must meet to be admitted to the degree programme.

Section 3 Structure and design

Article 3.1 Final examination, degree and distinctions
1. The programme is concluded by the Master’s examination.
2. A student who has passed the examination of the Master’s degree programme will be awarded the Master of Science (MSc) degree.
3. The degree referred to in the second paragraph, is exclusively awarded if the student has earned at least half of his/her EC at this university.
4. The examination board can award a distinction to a student who has successfully passed the degree programme examination. The rules for awarding a distinction are to be found in Article 4.7 of this EER.

Article 3.2 General learning outcomes
1. The degree programme has the following learning outcomes for students:
   a. Acquire knowledge, skills and insights in the relevant field of study;
   b. Develop academic competences;
   c. Prepare for their future career;
   d. Strengthen qualifications in the area of independent academic research;
   e. With regard to the specialisation Science, Management and Innovation, acquire knowledge, insight and skills in relevant areas of business administration, policy sciences and social beta themes;
   f. With regard to the specialisation Science in Society, acquire knowledge, insight and skill in relevant areas of media, knowledge transfer and social interaction;
   g. With regard to the specialisation Science and Education, acquire additional teaching competences.

Article 3.3 Curriculum
1. The programme comprises the total of the components as described in the programme-specific part of these regulations and is aimed at the realisation of well-defined objectives in the areas of the knowledge, understanding and skills that students are deemed to possess upon successful completion.
2. The programme has a number of research specialisations. These specialisations are described in Articles 7.1 and 7.5 of the programme specific provisions.
3. In addition, the faculty has 3 specialisations with a social component:
   a. Science, Management and Innovation
   b. Science in Society
   c. Science and Education
   These specialisations are described in paragraphs 7, 8 and 9.
4. Within the Master’s programme Computing Science, it is not possible to follow the specialisation referred to in paragraph 3 under c. (Science and Education).
5. Within the Master’s programme Information Science, it is not possible to follow any of the specialisations referred to in paragraph 3.

6. The faculty specialisations mentioned in paragraph 3 consist of programme-specific components equivalent to 60 EC (see the programme-specific provisions in this EER) and account for 60 EC of the programme as described below in paragraphs 7, 8 and 9. Each degree programme includes a component that is philosophical in nature with a minimum study load of 3 EC, free elective space of 6 EC and a portfolio component with a study load of 0 or 1 EC. For the specialisations Science, Management and Innovation and Science in Society, 3 EC of free electives space is included in the specialisation programme. For the specialisations Science, 6 EC of free electives space is included in the specialisation programme. The portfolio component is intended to enable students to reflect on study performance, planning and career orientation.

7. The specialisation Science, Management and Innovation includes the following components with the accompanying study load:
   a. Courses selected by the student from the following themes: 1) climate and energy and 2) health. After permission from the Examination Board, a different social beta theme course may be selected as well. Depending on the theme, the student will follow compulsory courses from Science, Management and Innovation with a total study load of 12 EC, consisting of:
      i. Core theme courses (6 EC);
      
      | Course code     | Course name                                                                 | EC |
      |-----------------|-----------------------------------------------------------------------------|----|
      | NWI-FMT022      | Climate and Energy                                                          | 6  |
      | NWI-FMT020      | The Bio Economy                                                              | 3  |
      | NWI-FMT026      | Energy Modelling                                                             | 3  |
      | NWI-MM020       | Sustainable Consumption and Production                                       | 3  |
      |
      | NWI-FMT023      | The Future of Health: from the laboratory to the clinic and from utopia to applications | 6  |

      ii. Courses on other themes (6 EC in total)
      
      • For the Climate and Energy theme, selection of:

      | Course code     | Course name                                                                 | EC |
      |-----------------|-----------------------------------------------------------------------------|----|
      | NWI-FMT021      | Neuroscience                                                                | 3  |
      | NWI-FMT025      | Synthetic Bio-chemistry, Nanomedicine and Tissue Engineering: from research lab to clinic | 3  |

      • For the Health theme, selection of:

      | Course code     | Course name                                                                 | EC |
      |-----------------|-----------------------------------------------------------------------------|----|
      | NWI-FMT021      | Neuroscience                                                                | 3  |
For specific social beta themes a curriculum of specific themes has been set (12 EC)

b. Compulsory Science, Management and Innovation components with a total study load of 15 EC:

<table>
<thead>
<tr>
<th>Course code</th>
<th>Course name</th>
<th>EC</th>
</tr>
</thead>
<tbody>
<tr>
<td>NWI-FMT003E</td>
<td>Innovation Management</td>
<td>6</td>
</tr>
<tr>

</tbody>
</table>

c. Free electives (3 EC) (part of the 6 EC free electives space of the Master’s)

d. Science, Management and Innovation final research project of 30 EC

8. The specialisation Science, Management and Innovation includes the following components with the accompanying study load:

a. Compulsory components with a total study load of 21 EC:

<table>
<thead>
<tr>
<th>Course code</th>
<th>Course name</th>
<th>EC</th>
</tr>
</thead>
<tbody>
<tr>
<td>NWI-FC002B</td>
<td>Science and Societal Interaction</td>

</tbody>
</table>

b. Electives within the specialisation with a total study load of at least 6 EC

c. Free electives (3 EC) (part of the 6 EC free electives space of the Master’s)

d. Science in Society internship and report totalling 30 EC.

9. The specialisation Science and Education includes the following components with the accompanying study load:

a. Series of lectures (5 EC)

b. Self-evaluation 1 (10 EC)

c. Supervised internship (15 EC)

d. Design and Research (10 EC)

e. Self-evaluation 2 (5 EC)

f. Independent internship (15 EC)

These components are provided by the Radboud Graduate School of Education. If, due to the successful completion of the education minor during the Bachelor’s programme or for other reasons, a portion of the above-mentioned components need not be followed, the corresponding number of EC must be filled with programme specific components.

10. The composition of the Master’s programme compiled by the student must be presented for
Article 3.4 Sequence of education and interim examinations

1. The graduation project of the specialisation Science, Management and Innovation cannot be taken before a passing grade has been earned or an exemption granted for the core theme courses and the Methods in Societal Research courses, as referred to in Article 3.3 paragraph 7 under a and b.

2. The graduation project of the specialisation Science in Society cannot be taken before a passing grade has been earned or an exemption granted for a total of 12 EC of compulsory components, including the component Methods in Societal Research, as referred to in Article 3.3 paragraph 8 under a.

3. The components of the specialisation Science and Education cannot be taken before a passing grade has been earned or an exemption granted for the programme-specific components with a study load of at least 30 EC, including the practical activities of the research internship/research thesis of the degree programme.

4. If applicable, the programme-specific section lists additional requirements regarding the sequence of the programme-specific components of the specialisations with a social component and for the research specialisations.

Article 3.5 - Type of interim examination

1. Each component of the degree programme will be concluded by an interim examination. Interim examinations may comprise more than one modular interim examination and are administered in the following forms:
   a. Written (paper and/or digitally);
   b. Oral;
   c. Presentation;
   d. Practical and related report.

2. At the request of the student, the Examination Board may allow an interim examination to be administered in a form other than stated above.

3. Students with disabilities are given the opportunity to take interim examinations in a manner appropriately suited to their disability. The Examination Board, if necessary, shall seek expert advice and counsel prior to reaching its decision. If the students in question require certain facilities for their interim examinations, they must request these from the faculty’s Education and Examination Administration no later than two weeks before the interim examination.

4. For oral examinations, no more than one person is tested at the same time, unless decided otherwise by the Examination Board.

5. An oral interim examination is not public, unless the Examination Board has deemed otherwise for exceptional cases.

6. Oral interim examinations are administered in the presence of at least one second examiner or an observer appointed by the Examination Board. In special cases, the Examination Board may require that the oral interim examination be recorded.
PART I General provisions and PART II Provisions applicable to all Master’s programmes
Established August 29, 2016

7. For each component, the examiner with the approval of the Examination Board will announce the form in which the interim examinations will be administered prior to the commencement of the academic year. In special cases, the examiner may change the format of examination later on in the academic year. This may only be done before the start of the component in question and must be approved by the Examination Board.

Article 3.6 Exemptions
1. The Examination Board at the request of a student and having heard the examiner involved, may exempt the student, either partially or fully, from sitting an interim examination if the student:
   a. has passed a course examination in a relevant subject at a university or institute of higher vocational education (HBO);
   b. demonstrates that he/she has adequate knowledge and skills regarding the component in question as a result of relevant work experience or professional experience.
2. At the request of the student who has completed a Bachelor’s at the faculty, granting access to the Master’s, the Examination Board may grant the student exemption for a maximum of two Master’s courses or for multiple Master’s courses with a total study load of no more than 10 EC, provided these were earned as extracurricular Bachelor’s components and correspond to the Master’s components.
3. Exemptions as referred to in paragraphs 1 and 2 cannot be granted for final examination papers.

Article 3.7 Term of validity of successfully completed interim examinations
1. The term of validity of successfully completed interim examinations is unlimited.
2. Contrary to the provisions in the first paragraph, the Examination Board may set supplementary or replacement requirements for a component, if it judges that the requirements pertaining to that interim examination deviate considerably from those that were in effect at the time the interim examination was taken.

Section 4 Examinations
Article 4.1 Frequency of interim examinations
1. Students are given at least two opportunities per year to take interim examinations, with the exception of practical courses or the practical portion of components, which can be taken at least once per academic year. Interim examinations are administered immediately upon completion of the component, during a period to be determined.
2. Contrary to the stipulation in the first paragraph, there will be at least one opportunity in the following year to take an interim examination for a course that was taught for the final time in a particular academic year.
3. If a certain component is not given in a particular year, the opportunity to take the corresponding examination will be given once in that year, as long as the interim examination is administered in written or oral form.
Article 4.2 Registration for interim examinations

1. Students who register through OSIRIS for courses in the programme are also automatically registered for the first interim examination opportunity in the relevant academic year. If a student does not wish to participate in the interim examination, he/she must deregister for the examination via Osiris up to 1 day before the examination date. After the abovementioned time period, the student can only personally deregister directly with the lecturer up until the starting time of the interim examination.

If the student does not sit the examination without having deregistered in time, he/she will lose an examination opportunity for the interim examination, unless the Examination Board decides otherwise in exceptional cases.

2. The student must register for an interim examination in accordance with the applicable guidelines and instructions, no later than seven days before the interim examination date.

3. If a resit for an interim examination has been taken two or more times, additional requirements are set for subsequent resits.

4. The “Regulations for examination participation” in these EER are applicable in these cases.

Article 4.3 Confirmation of interim examination results

1. The result of an interim examination is determined by an examiner in the form of a grade on a scale of 1 (lowest possible grade) to 10 (highest possible grade), consisting exclusively of whole number or half numbers. The grade 5.5, however, is never given. When rounding off between 5 and 6 the rule applies that a grade lower than a 5.5 is rounded down to a five (5) which is an insufficient grade, meaning the educational component has not been successfully completed; while a 5.5 and higher is rounded up to a six (6), meaning that this educational component has been successfully completed. In addition to results in the form of a grade, the assessments “satisfactory” and “not satisfactory” may also be awarded.

2. If a student re-sits an interim examination, the most recent mark will determine the final result.

Article 4.4 Publication of results

1. The examiner shall, on the date that an oral interim examination is administered, determine the result and give the student a written statement of this.

2. The examiner shall determine the result of a written interim examination within 15 working days of the date it was administered. Here the precondition applies that there are at least 10 work days between the date of the publication of the result in Osiris and the date of the resist. The examiner will provide the faculty administration office with the necessary details for them to award of the document of proof regarding the student’s result. This result must be made available to the student within two work days after the result has been determined.

3. In special cases, the Examination Board may extend the term in which the result must be determined, as referred to in paragraph 2, by a maximum of 10 work days.

4. In instances in which an interim examination is administered in a form other than oral or written, the Examination Board shall determine prior to the administration of the examination how and when the student shall be issued a statement of the result. This term shall not be longer than 30 days after the interim examination was administered.
5. On this statement of the result of an interim examination, the student is informed of his/her right of inspection, referred to in Article 4.5 as well as the right to appeal to the Examination Appeals Board.

6. A student may submit an appeal of a decision by the Examination Board to the Examination Appeals Board within six weeks.

**Article 4.5 Right of inspection and right of cognizance**

1. Within at least 30 days following publication of a written interim examination result, the student may request access to review and inspect all graded work. In relation to the results of interim examinations with “open” questions, at the student’s request he/she will be granted at cost price a copy of their graded work.

2. During the period, referred to in paragraph 1 of this Article, any student who has taken an interim examination may review the questions and assignments of the interim examination in question, as well as the standards on which the result was based.

3. The Examination Board may determine that the inspection or review shall take place at a particular location and provide at least two different time periods. If the student demonstrates that he/she is unable to attend the inspection or review as a result of force majeure, then another option shall be offered, if possible within the period stated in paragraph 1 of this Article.

4. In all cases, provided this has been requested by the student in a timely fashion, the inspection must take place a minimum of five working days before the resit of an interim examination.

5. The examiner shall retain all written interim examinations and related papers (assignments or otherwise) that count towards the final result for a period of two years following the date the examination was administered. Master’s programme reports and theses must remain available for visitations, accreditations and inspections and shall be kept for seven years.

**Article 4.6 Confirmation of the result of the final examination**

1. The student is given the opportunity to take the final examination after he/she has provided sufficient proof that he/she has passed the components leading up to the final examination.

2. The Examination Board will determine the result of the final examination, as well as the rules in relation to the manner in which the result of the examination is determined.

3. Prior to determining the result of the final examination, the Examination Board may evaluate and assess the student’s knowledge with respect to one or more components or aspects of the programme, if and to the degree to which the results of the related interim examinations justify this.

**Article 4.7 Awarding distinctions**

1. With due observance of the provisions set out in this Article, the Examination Board is responsible for the decision of whether a distinction shall be awarded and if so, which distinction.

2. The distinctions
   a. “cum laude” shall be awarded if the weighted average result of the final assessment of the components referred to in paragraph 3 is equal to or higher than 8.0.
PART I General provisions and PART II Provisions applicable to all Master’s programmes
Established August 29, 2016

b. “summa cum laude” shall be awarded if the weighted average result of the final
   assessment of the components referred to in paragraph 3 is equal to or higher than 9.0.

3. The distinction shall be calculated on the basis of all components of the examination programme
   for which a mark has been awarded on a scale of 1 to 10, with the exception of extra-curricular
   components.

4. The number of EC of the component referred to in paragraph 3 shall serve as the weighting
   factor for the calculation of the weighted average result, unless provided otherwise in the
   programme-specific part of these regulations.

5. The distinction shall not be awarded if more than 10 per cent of the total study load of the
   examinations for the degree programme (being one or more components) has been re-sat or if
   interim examinations have been re-sat more than once, unless the Examination Board decides
   otherwise, stating the reasons for this decision.

6. The distinction shall not be awarded if fraud was discovered in one of the examinations of the
   degree programme.

7. Supplementary to paragraph 2, the degree programme uses the weighing factors below when
   determining distinctions.
   The following criteria are used for awarding the cum laude distinction:
   o The EC weighted average of the assessments of all the examination components with a
     scope of fewer than 20 EC must at least equal 8.0 without any rounding.
   o The EC weighted average of the assessments of all the examination components with a
     scope greater than or equal to 20 EC must at least equal 8.0 without rounding.
   The following criteria are used for awarding the summa cum laude distinction:
   o The EC weighted average of the assessments of all the examination components with a
     scope of fewer than 20 EC must at least equal 9.0 without rounding.
   o The EC weighted average of the assessments of all the examination components with a
     scope greater than or equal to 20 EC must at least equal 9.0 without rounding.

Article 4.8 – Fraud and plagiarism

1. If an examiner or supervisor suspects or finds proof of fraud, plagiarism or other irregularities
   during the interim examination or while assessing the interim examination or written
   assignment, the examiner or supervisor shall inform, in writing, both the relevant programme
   Examination Board and the student concerned. The student will be permitted to complete the
   interim examination.

2. The Examination Board will then decide as quickly as possible but at least within 20 work days
   whether fraud or plagiarism has indeed been committed and what possible actions will be taken.
   The Examination Board shall not make a decision in this regard until after hearing the student in
   question, or at least providing the student with the opportunity to be heard. A written report of
   this hearing shall be made.

3. In the event of fraud or plagiarism, a note of this will be made in the student’s file.

4. In case of fraud during an interim examination, the student shall be excluded from further
   participation in the interim examination and no grade shall be awarded. This means the student
   will have used up one of his/her interim examination opportunities.
5. In accordance with Article 7.12b paragraph 2 of the Act, the Examination Board may, in case of fraud or plagiarism, bar the student from sitting for one or more interim examinations and/or final examinations at the institute for a maximum period of 12 months.

6. In the event of serious fraud, the institutional board may recommend that the student's enrolment for the degree programme be terminated.

7. In cases of plagiarism, the relevant Examination Board may, in addition to the measures listed under paragraph 5 of this Article, require the student to complete a new assignment on a subject to be determined by the lecturer responsible for that course examination.

Section 5 Study performance, support and advice

Article 5.1 – Study performance and support

1. The faculty dean is responsible for recording student results in such a way that, upon request, the Examination Board can provide the student with an overview of the progress of the study within a reasonable time of this request.

2. The dean is responsible for providing adequate student counselling.
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

Section 6 Access to the degree programme and education

Article 6.1 Admission requirements
Admission requirements for the programme:

a. Students must have successfully passed the final examination of the Radboud University Bachelor’s programme in Science; or
b. Students must be in possession of a degree certificate that is at least equal to the degree referred to in paragraph 6.1 under a; or
c. Students must have demonstrated suitability for participation in the degree programme, in the opinion of the Examination Board.

And students must provide proof of sufficient proficiency in English, as described in Article 6.3.

Article 6.2 Pre-Master’s

Not applicable

Article 6.3 Language requirements

1. In addition to the admission requirements described above, sufficient proficiency in English is also required. This language requirement is satisfied if a student:
   a. Is in possession of a diploma of a university of applied sciences (HBO); or
   b. Is in possession of a diploma of a Bachelor’s diploma earned at a Dutch university; or
   c. Has passed one of the following tests:
      i. The TOEFL with a score of 575 or higher for the paper version
      ii. The TOEFL with a score of 232 or higher for the computer version
      iii. The TOEFL with a score of 90 or higher for the online version
      iv. The IELTS with a score of 6.5 or higher;
      v. The Cambridge CAE or CPE with a score of C or higher.

   The Examination Board may in certain cases assess whether a student has sufficient proficiency in English.

2. A sufficient command of the Dutch language is required to participate in components taught in Dutch. Non-Dutch students have met the language requirement for sufficient proficiency in Dutch if they have passed the state examination of Dutch as a second language, level 2.

   The Examination Board may in certain cases assess whether a student has sufficient proficiency in Dutch.
Section 7 Structure and design

Article 7.1 Programme-specific learning outcomes
1. In addition to the general learning outcomes described in Part II of these regulations, the degree programme also aims to achieve the following learning outcomes*:

* The following programme disciplines are seen as foundational: Chemistry, Physics and Astronomy, Biology, Mathematics and Computing Science

The Master's graduate in Science:

a. has specialised insight in at least one interdisciplinary field of Natural Sciences
b. has sufficient knowledge in this specialised field to carry out scientific research under supervision
c. has the ability to read scientific articles about their chosen specialisations comprehensively, to master newly acquired knowledge within those fields of specialisation and to integrate it into existing knowledge
d. has the ability to formulate new definitions of questions and hypotheses within their chosen specialisations and to select the correct paths and research methods for resolving these questions
e. has the ability to follow general scientific developments within the chosen interface of Natural Sciences
f. has the ability to follow general scientific developments within the chosen interface of Natural Sciences
g. graduates will be able to set up and perform experimental or theoretical scientific research, to systematically process and critically interpret the research results, and to formulate conclusions
h. has the ability to present research results, both orally with clear delivery and in written form, in a scientific article for professional colleagues and for a non-specific, expert audience
i. has the ability to communicate about scientific knowledge at specialist level with professional colleagues working in the same discipline
j. has sufficient knowledge of and insight into the societal significance of the Natural Sciences to be able to reflect on social problems based on the knowledge gained from the Natural Sciences

2. Students who choose a content/research-oriented specialisation, will also achieve the following learning outcomes upon graduation:

The Master's graduate in Science with a research specialisation:

k. has sufficient knowledge and skills to carry out independent research within at least one interdisciplinary subject in the Natural Sciences
l. is able to critically analyse research results and based on these results is able to carry research to the next level

3. Students who choose the specialisation Science, Management and Innovation as described in Article 3.3 paragraph 3a, will also achieve the following learning outcomes upon graduation:

k. Graduates have gained deep knowledge on their theme, based on connections made between their own science discipline and other science disciplines, on the one hand, and approaches from fields that study society, politics and policy, economics and companies (remember/understand).
l. With this knowledge, they can analyse specific problems within their theme, are able to name a range of approaches to address the problem, and argue for and select feasible options, taking into
account the full width of technological, societal, political and economic perspectives (understand/analyse).

m. The students are proficient in the use of methods and techniques, including basic financial and economic ones, to substantiate strategies and plans, and are able to effectively use a wide variety of information and communication channels (apply/evaluate).

n. The students can balance perspectives and interests in the specific context of a company, governmental organisation or international organisation, or in configurations of those and other actors, in order to formulate feasible strategies and plans to implement options to address their thematic challenges (evaluate/create).

o. The students are capable of clearly communicating their insights and choices to others, both in written and in spoken form (communicate).

p. The students are capable of working in multidisciplinary teams; they know how to divide tasks based on knowledge and competencies and how to take responsibility, and they respect diverging views.

4. Students who choose the specialisation Science in Society as described in Article 3.3 paragraph 3b, will also achieve the following learning outcomes upon graduation:

k. Capable of analysing the role of scientific expertise in societal and political decision making with regard to socio-scientific issues;

l. Capable of designing and conducting independent and methodologically sound social research at the interface of science and society and capable of contributing to academic research;

m. Capable of understanding and designing public and stakeholder participation processes in research and innovation;

n. Capable of analysing, improving and evaluating interdisciplinary collaborations with multiple stakeholders, integrating different perceptions, interests and types of knowledge (experiential, professional and scientific);

o. Capable of substantiating and communicating the relevance of one's scientific discipline in society.

5. Students who choose the specialisation Science and Education as described in Article 3.3 paragraph 3b, will also achieve the following learning outcomes upon graduation:

k. Graduates have knowledge of and insight into the theoretical principles of discipline-specific thinking, educational design, and the methods and techniques of applying didactic research in the discipline.

l. Graduates are able to design, implement and systematically evaluate an educational design and a scientific study, drawing a link between didactic and professional practice concepts, discipline-specific thinking of the students at different levels and problems from teaching practice.

m. Graduates devote attention to discipline-specific learning of individual and unique students, and focus on developing inspiring education.

n. Graduates are able to apply thorough scientific knowledge of general didactic concepts about the learning of individual students, and methods to improve both the social climate in the classroom and to answer individual learning needs of the students.
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

o. Graduates are able to act in a differentiated way and improve the social climate for collaboration, and in doing so, set independent priorities and, after consultation with relevant third parties, respond appropriately to development and behavioural problems.
p. Graduates focus on collaboration and responsible behaviour based on clear communication with individual students and colleagues, and on the basis of a personal vision.
q. Graduates develop a personal professional knowledge base to justify their own actions and understand the actions of colleagues and supervisors.
r. Graduates use the professional knowledge base and contextual feedback (students, colleagues, supervisors) to evaluate and guide their own professional development.
s. Graduates develop a personal identity in the context of their own actions, external frameworks and ethical dilemmas.

Article 7.2 Programme type
The programme is only offered full-time.

Article 7.3 Programme language
The degree programme is taught in English.
Contrary to this provision the specialisation Science and Education, as stated in Article 3.3 paragraph 9, is taught in Dutch.

Article 7.4 Composition of the programme
1. Subject to the provisions in Part II of these regulations, the student chooses one of the following specialisations of the degree programme:
   a) Chemistry for Life
   b) Molecular Chemistry
   c) Physical Chemistry
   d) Medical Epigenomics
   e) Neuroscience
   f) Particle and Astrophysics
   g) Physics of Molecules and Materials
   h) Science, Management and Innovation
   i) Science in Society
   j) Science and Education
2. Students must select their specialisation through Osiris within two months of the start of the Master’s programme.
3. Internship regulations: Internships must be multidisciplinary in nature, which must be demonstrated by submitting the internship planning form. Students must submit an internship planning form prior to the start of an internship.
   Every year, the degree programme publishes a list of approved internship departments for each specialisation, as well as for approved courses with a biomedical or molecular component.
The following provisions are applicable for the specialisations in Article 7.5 a to g: Instead of internships of respectively 59 and 30 EC, two internships of 44 + 45 EC may also be chosen, or a single internship within a collaboration at two different departments of a total of 89 EC, including a maximum of 12 EC of courses. In these cases, a literature thesis must be written for one of the internships.

**Article 7.5a Master's specialisation in Chemistry for Life**

Compulsory courses within the specialisation in Chemistry for Life:
- NWI-MOL401 - Chemical Biology (3 EC)
- NWI-MOL402 - Systems Chemistry (3 EC)
- NWI-MOL403 - Organic Chemistry of Biomolecules (3 EC)
- NWI-MOL404 - Instrumental Analysis in (Bio)Molecular Chemistry (3 EC)
- NWI-MOL410 - Omics (3 EC)

The Master's degree programme with the specialisation in Chemistry for Life is comprised as follows:
a. specialisation portion consisting of:
   - the compulsory courses pertaining to the chosen specialisation: 15 EC;
   - a specialisation-related research internship: 59 EC (practical work + report + presentation + literature thesis (6 EC) + optionally max 6 EC course);
   
b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);
   
c. NWI-MOL412 - Career orientation (1 EC)
   
d. Natural Sciences Master’s course: 6 EC;
   
e. free electives: 6 EC;

f. one or more philosophical courses, in total amounting to at least 3 ECs, to be selected from:
   - NWI-FFIL202A Evolution and the Mind (3 EC)
   - NWI-FFIL203B Bio-ethics for Life Scientists (3 EC)
   - NWI-FFIL205A Science and Literature (3 EC)
   - NWI-FFIL209B Environmental Ethics (3 EC)
   - NWI-FFIL211B Transformative Role of Physics (3 EC).
   - NWI-FFIL212 Philosophy of Water Management (3 EC)
   - NWI-FFIL214 Science and Metaphysics (3 EC)
   - NWI-FFIL215 Upgrading the Human (3 EC)
   - NWI-FFIL300C Mathematics and World Views (3 EC)

One of the compulsory specialisation courses may be exchanged for a course from the specialisations listed in Article 7.5 b to g.
Article 7.5b Master’s specialisation in Molecular Chemistry

Compulsory courses within the specialisation in Molecular Chemistry:
- NWI-MOL402 - Systems Chemistry (3 EC)
- NWI-SM302 - Advanced Organic Synthesis (3 EC)
- NWI-SM019A - Polymer Chemistry (3 EC)
- NWI-SM292A - Molecular Materials (3 EC)
- NWI-MOL404 - Instrumental Analysis in (Bio)Molecular Chemistry (3 EC)

The Master’s degree programme with the specialisation in Molecular Chemistry is comprised as follows:

a. specialisation portion consisting of:
- the compulsory courses pertaining to the chosen specialisation: 15 EC;
- a specialisation-related research internship: 59 EC (practical work + report + presentation + literature thesis (6 EC) + optionally max 6 EC course);

b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);

c. NWI-MOL412 - Career Orientation (1 EC)

d. Natural Sciences Master’s course: 6 EC;

e. free electives: 6 EC;

f. one or more philosophical courses, in total amounting to at least 3 ECs, to be selected from:
- NWI-FFIL202A Evolution and the Mind (3 EC)
- NWI-FFIL203B Bio-ethics for Life Scientists (3 EC)
- NWI-FFIL205A Science and Literature (3 EC)
- NWI-FFIL209B Environmental Ethics (3 EC)
- NWI-FFIL211B Transformative Role of Physics (3 EC).
- NWI-FFIL212 Philosophy of Water Management (3 EC)
- NWI-FFIL214 Science and Metaphysics (3 EC)
- NWI-FFIL215 Upgrading the Human (3 EC)
- NWI-FFIL300C Mathematics and World Views (3 EC)

One of the compulsory specialisation courses may be exchanged for a compulsory course from the specialisations listed in Article 7.5 a or c to g.

Article 7.5c Master’s specialisation in Physical Chemistry

Compulsory courses within the specialisation in Physical Chemistry:
- NWI-MOL406 - Quantum Chemistry (3 EC) or NWI-SM297 - Molecular Modelling (3 EC)
- NWI-MOL407 - Materials Science (3 EC)
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

- NWI-MOL408 - Physical Chemistry of Molecular Aggregates (3 EC)
- NWI-MOL409 - Advanced Spectroscopy (6 EC)

The Master’s degree programme with the specialisation in Physical Chemistry is comprised as follows:

a. specialisation portion consisting of:
   - the compulsory courses pertaining to the chosen specialisation: 15 EC;
   - a specialisation-related research internship: 59 EC (practical work + report + presentation + literature thesis (6 EC) + optionally max 6 EC course);

b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);

c. NWI-MOL412 - Career Orientation (1 EC)

d. Natural Sciences Master’s course: 6 EC;

e. free electives: 6 EC;

f. one or more philosophical courses, in total amounting to at least 3 ECs, to be selected from:
   - NWI-FFIL202A Evolution and the Mind (3 EC)
   - NWI-FFIL203B Bio-ethics for Life Scientists (3 EC)
   - NWI-FFIL205A Science and Literature (3 EC)
   - NWI-FFIL209B Environmental Ethics (3 EC)
   - NWI-FFIL211B Transformative Role of Physics (3 EC).
   - NWI-FFIL212 Philosophy of Water Management (3 EC)
   - NWI-FFIL214 Science and Metaphysics (3 EC)
   - NWI-FFIL215 Upgrading the Human (3 EC)
   - NWI-FFIL300C Mathematics and World Views (3 EC)

One of the compulsory specialisation courses may be exchanged for a course from the specialisations listed in Article 7.5 a, b or d to g.

Article 7.5c Master’s specialisation in Medical Epigenomics

Compulsory courses within the specialisation in Medical Epigenomics:

- NWI-BM042B Trends in Medical Biosciences I (3 EC)
- NWI-BM062 Epigenomics in Health and Disease (3 EC)
- NWI-BM064 Protein Dynamics and Networks (3 EC)
- NWI-BM066 Computation for Biologists (3 EC)
- NWI-BM047B Trends in Medical Biosciences II (3 EC)

The Master’s degree programme with the specialisation in Medical Epigenomics is comprised as follows:

a. specialisation portion consisting of:
   - the compulsory courses pertaining to the chosen specialisation: 15 EC;
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

- a specialisation-related research internship: 59 EC (practical work + report + presentation + literature thesis (6 EC) + optionally max 6 EC course);

b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);

c. NWI-MOL412 - Career Orientation (1 EC)

d. Natural Sciences Master’s course: 6 EC;

e. free electives: 6 EC;

f. one or more components of a philosophical nature, in total amounting to at least 3 ECs, to be selected from:
   • NWI-FFIL202A Evolution and the Mind (3 EC)
   • NWI-FFIL203B Bio-ethics for Life Scientists (3 EC)
   • NWI-FFIL205A Science and Literature (3 EC)
   • NWI-FFIL209B Environmental Ethics (3 EC)
   • NWI-FFIL211B Transformative Role of Physics (3 EC).
   • NWI-FFIL212 Philosophy of Water Management (3 EC)
   • NWI-FFIL214 Science and Metaphysics (3 EC)
   • NWI-FFIL215 Upgrading the Human (3 EC)
   • NWI-FFIL300C Mathematics and World Views (3 EC)

One of the compulsory specialisation courses may be exchanged for a compulsory course from the specialisations listed in Article 7.5 e to g.

Article 7.5e Master’s specialisation in Neuroscience

Compulsory courses within the specialisation in Neuroscience:
   • NWI-BM044B - Systems Neuroscience (3 EC)
   • NWI-BM053B - Behavioural Neuroscience (3 EC)
   • NWI-NM103 - Methods in Neuroscience (3 EC)
   • NWI-BM059 - Systematic Reviews in Neuroscience (6 EC)

The Master’s degree programme with the specialisation in Neuroscience is comprised as follows:
   a. specialisation portion consisting of:
      - the compulsory courses pertaining to the chosen specialisation: 15 EC;
      - a specialisation-related research internship: 59 EC (practical work + report + presentation + optionally max 6 EC course); the course Systematic Reviews in Neuroscience takes the place of the literature thesis

   b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);

   c. NWI-MOL412 - Career Orientation (1 EC)
d. Natural Sciences Master’s course: 6 EC;

e. free electives: 6 EC;

f. one or more philosophical courses, in total amounting to at least 3 ECs, to be selected from:
   - NWI-FFIL202A  Evolution and the Mind  (3 EC)
   - NWI-FFIL203B  Bio-ethics for Life Scientists  (3 EC)
   - NWI-FFIL205A  Science and Literature  (3 EC)
   - NWI-FFIL209B  Environmental Ethics  (3 EC)
   - NWI-FFIL211B  Transformative Role of Physics  (3 EC)
   - NWI-FFIL212  Philosophy of Water Management (3 EC)
   - NWI-FFIL214  Science and Metaphysics  (3 EC)
   - NWI-FFIL215  Upgrading the Human  (3 EC)
   - NWI-FFIL300C  Mathematics and World Views  (3 EC)

One of the compulsory specialisation courses (3 EC) may be exchanged for a compulsory course from the specialisations listed in Article 7.5 a to d or f to g.

Article 7.5f Master’s specialisation in Particle and Astrophysics

Compulsory courses within the specialisation in Particle and Astrophysics:
   - NWI-NM026D  Cosmology  (9 EC)
   - NWI-NM001B  Electrodynamics  (3 EC)
   - NWI-NM072H  Student Seminar Particle and Astrophysics  (3 EC)

The Master’s degree programme with the specialisation in Neuroscience is comprised as follows:

a. specialisation portion consisting of:
   - the compulsory courses pertaining to the chosen specialisation: 15 EC;
   - a specialisation-related research internship: 59 EC (practical work + report + presentation + optionally max 6 EC course); the course Systematic Reviews in Neuroscience takes the place of the literature thesis

b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);

c. NWI-MOL412 - Career Orientation (1 EC)

d. Natural Sciences Master’s course: 6 EC;

e. free electives: 6 EC;

f. one or more components of a philosophical nature, in total amounting to at least 3 ECs, to be selected from:
   - NWI-FFIL202A  Evolution and the Mind  (3 EC)
   - NWI-FFIL203B  Bio-ethics for Life Scientists  (3 EC)
   - NWI-FFIL205A  Science and Literature  (3 EC)
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

- NWI-FFIL209B Environmental Ethics (3 EC)
- NWI-FFIL211B Transformative Role of Physics (3 EC).
- NWI-FFIL212 Philosophy of Water Management (3 EC)
- NWI-FFIL214 Science and Metaphysics (3 EC)
- NWI-FFIL215 Upgrading the Human (3 EC)
- NWI-FFIL300C Mathematics and World Views (3 EC)

One of the compulsory courses (3 EC) may be exchanged for a compulsory course from the specialisations listed in Article 7.5 a to d or f to g.

**Article 7.5g Master’s specialisation in Physics of Molecules and Materials**

**Compulsory courses within the specialisation in Physics of Molecules and Materials:**
- NWI-NM009B Solid State Physics (6 EC)
- NWI-NM089B Molecular Physics (6 EC)
- NWI-NM001B Electrodynamics (3 EC)

**The Master’s degree programme with the specialisation in Physics of Molecules and Materials is comprised as follows:**

a. specialisation portion consisting of:
- the compulsory courses pertaining to the chosen specialisation: 15 EC;
- a specialisation-related research internship: 59 EC (practical work + report + presentation + optionally max 6 EC course); the course Systematic Reviews in Neuroscience takes the place of the literature thesis

b. two research internships in a different discipline: 30 EC (practical work + report + presentation + optionally max 6 EC course);

c. NWI-MOL412 - Career Orientation (1 EC)

d. Natural Sciences Master’s course: 6 EC;

e. free electives: 6 EC;

f. one or more components of a philosophical nature, in total amounting to at least 3 ECs, to be selected from:
- NWI-FFIL202A Evolution and the Mind (3 EC)
- NWI-FFIL203B Bio-ethics for Life Scientists (3 EC)
- NWI-FFIL205A Science and Literature (3 EC)
- NWI-FFIL209B Environmental Ethics (3 EC)
- NWI-FFIL211B Transformative Role of Physics (3 EC).
- NWI-FFIL212 Philosophy of Water Management (3 EC)
- NWI-FFIL214 Science and Metaphysics (3 EC)
- NWI-FFIL215 Upgrading the Human (3 EC)
- NWI-FFIL300C Mathematics and World Views (3 EC)
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

One of the compulsory courses (3 EC) may be exchanged for a compulsory course from the specialisations listed in Article 7.5 a to e or g.

Article 7.5h Master’s specialisation in Science, Management and Innovation, Science in Society and Science and Education

The faculty specialisations comprise the following programme-specific components of 60 EC in total:

1. Science, Management and Innovation:
   a. Natural Sciences Master’s courses (a minimum of 15 EC);
   b. NWI-MOL412 - Career Orientation (1 EC);
   c. Free electives (3 EC);
   d. A philosophical course (3 EC), to be selected from the courses listed in Article 7.5a paragraph 5;
   e. Scientific internship at the academic level (a minimum of 29 EC);
      Consisting of practical work, a report, presentation and optionally a specialisation course of a maximum of 6 EC
   f. Electives of 9 EC to be added to the components described in paragraph a and/or e.

The faculty portion of these specialisations are described in Article 3.3 paragraph 7.

2. Science in Society:
   a. Natural Sciences Master’s courses (a minimum of 15 EC);
   b. NWI-MOL412 - Career Orientation (1 EC);
   c. Free electives (3 EC);
   d. A philosophical course (3 EC), to be selected from the courses listed in Article 7.5a paragraph 5;
   e. Scientific internship at the academic level (a minimum of 29 EC);
      Consisting of practical work, a report, presentation and optionally a specialisation course of a maximum of 6 EC
   f. Electives of 9 EC to be added to the components described in paragraph a and/or e.

The faculty portion of these specialisations are described in Article 3.3 paragraph 8.

3. Science and Education:
   a. Natural Sciences Master’s courses (a minimum of 15 EC);
   b. NWI-MOL412 - Career Orientation (1 EC);
   c. Free electives (6 EC)
   d. A philosophical course (3 EC), to be selected from the courses listed in Article 7.5a paragraph 5;
   e. Scientific internship at the academic level (a minimum of 29 EC);
      Consisting of practical work, a report, presentation and optionally a specialisation course of a maximum of 6 EC
   f. Elective space of 6 EC to be added to the components described in paragraph a and/or e.
PART III Programme-specific provisions for the MASTER’S PROGRAMME IN SCIENCE
Established August 29, 2016

The portion of these specialisations that are provided by the Radboud Graduate School of Education are described in Article 3.3 paragraph 9. Admission to the components of the Radboud Graduate School of Education, with the aim of earning a first degree teaching qualification in Chemistry or Biology, is granted after an assessment of the content of the Molecular Life Sciences Bachelor’s and Master’s programme which the student has taken. This assessment is conducted by the responsible teaching professional at the Radboud Graduate School of Education.

Article 7.5i Deviating programme
If a student does not choose a specialisation, he/she must submit a motivated request for permission to the Examination Board for an alternative course selection for the Master’s programme. The submitted course selection must include at least 60 EC, including at least 15 EC of Master’s courses and a programme-specific internship.
Part IV – Transitional and final provisions
Established August 29, 2016

Section 9 Transitional provisions

Section 10 Final provisions

Article 10.1 Safety net scheme and hardship clause
1. In any situations which are not fully or clearly covered by these regulations, the decision lies with the dean.
2. Any situations which these regulations may result in unreasonable hardship for individual students, the Examination Board or the dean is authorised to make an exception to the provisions in the Education and Examination Regulations.

Article 10.2 Confirmation and amendments
1. Notwithstanding the provisions in Article 7 of the Structure Regulations, these regulations are drawn up or amended by the dean after receiving advice from the programme committees and after having obtained approval from the faculties’ general assembly.
2. An amendment to these regulations cannot enter into force in the current academic year, unless the situation has the potential to make it extremely difficult for the student to participate in the programme.
3. Article 10.3 Entry into force

These regulations shall enter into force on 1 September 2016.

Article 10.4 Publication
1. The dean is responsible for publishing these regulations and any amendments thereto.
2. Interested parties may consult these regulations on the website: www.radboudnet.nl or www.student.ru.nl

As established by the dean on August 29, 2016
Regulations for examination participation

These regulations are applicable to all students at the Faculty of Science and are in regards to the central registration and deregistration for examinations and the application procedure for additional examination opportunities.

1. A student has two examination opportunities for each component.

2. By registering for a course in Osiris, you will be automatically registered for the first examination opportunity.

3. Contrary to point 2, students are required to register for all other examinations through Osiris. This is possible up to 7 days before the examination.

4. Students can deregister for the examination in Osiris up to 1 day before the examination date.

5. After the time period mentioned in point 4, students can only personally deregister directly with the lecturer up until the starting time of the examination.

6. If a student does not sit the examination without having deregistered through one of options stipulated above, they lose an examination opportunity (1 of 2). This is logged in the examination administration as “ND” (“niet deelgenomen” - did not participate).

7. If the student can demonstrate that they were unable to take the examination or deregister in a timely fashion due to mitigating circumstances, the Examination Board may decide to disregard the original registration for the examination.

8. If the examination has not been passed after the second attempt, the student must get permission from the lecturer to take part in the examination each additional time he/she wishes to take it. This permission is requested via an online form: [http://www.radboudnet.nl or www.student.ru.nl](http://www.radboudnet.nl or www.student.ru.nl). The student must hand in the form signed by the lecturer to the Student Service Desk. The Student Service Desk handles the examination registrations. The student can check their registration in Osiris.

9. These regulations are in effect from 1 September 2016.
Code of Conduct for foreign language use, as referred to in Article 7.2 (c) of the Higher Education and Research Act (the Act)
(Agreed upon by the Executive Board)

At Radboud University the following code of conduct applies:

Article 1
At Radboud University Nijmegen, allowance for administering examinations and interim examinations in a language other than Dutch will be considered if the specific nature, design or quality of the education or nationality of the students necessitate this.

Article 2
A decision to use a foreign language will be made by the dean of the faculty in question, after having received advice from the programme committee. The dean will observe the following principles:
- the need to use a different language other than Dutch must be clear;
- examinations and interim examinations for English-speaking degree programmes are administered in English; interim examinations of courses taught in English are administered in English, unless the examination committee of the degree programme in question decides otherwise;
- education in a foreign language must meet the same quality standards as education in Dutch.

Article 3
The decision by the dean is included in the education and examination regulations of the degree programme.

Article 4
The dean of the faculty will report his/her decision to the Executive Board.
