

HFML affiliation

After the names of the authors:

High Field Magnet Laboratory (HFML - EMFL), Radboud University, Toernooiveld 7, 6525 ED Nijmegen, The Netherlands.

If own research and not user support, include second affiliation

Radboud University, Institute for Molecules and Materials, Heyendaalseweg 135, 6525 AJ Nijmegen, The Netherlands

HFML acknowledgment

Standard acknowledgment phrase HFML

This work was supported by HFML-RU/NWO-I (and/or LNCMI-CNRS and/or HLD-HZDR*), member(s) of the European Magnetic Field Laboratory (EMFL).

For supported by EPSRC (e.g. when a co-author has a UK affiliation)

This work was supported by HFML-RU/NWO-I (and/or LNCMI-CNRS and/or HLD-HZDR*), member(s) of the European Magnetic Field Laboratory (EMFL) and by EPSRC (UK) via its membership to the EMFL (grant no. EP/N01085X/1)

** Add LNCMI-CNRS and/or HLD-HZDR when researchers from LNCMI and/or HLD are involved*

General NWO-I acknowledgment, for specific NWO grants

<https://www.nwo-i.nl/nwo-institutenorganisatie/verantwoording-en-gebruik-nwo-logo/>

For research supported by FOM (project started before 1 January 2017)

This work is part of the research programme of the Foundation for Fundamental Research on Matter (FOM), which is part of the Netherlands Organisation for Scientific Research (NWO)

For research supported by NWO-I (project started after 1 January 2017)

This work is part of the research programme XXX with project number XXX, which is (partly) financed by the Netherlands Organisation for Scientific Research (NWO).

For research supported by EU project Magnapharm

Our work is supported by MagnaPharm, a collaborative research project funded by the European Union's Horizon 2020 Research and Innovation programme under Grant Agreement Number 736899.

For research supported by EU project IMME-NEM

A.M. acknowledges funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie Grant agreement No. 746762 ('IMME-NEM')
